<i>Preface</i>	IX	<b>5 Engine cooling, vehicle heating and air conditioning</b>	124
<i>Acknowledgements</i>	X	5.1 Heat transfer and cooling media	124
<i>Automotive technical abbreviations</i>	XI	5.2 Engine air-cooling system	125
<b>1 The reciprocating piston petrol engine</b>	1	5.3 Engine water-cooling system	127
1.1 Modern requirements	1	5.4 Engine cooling systems for passenger cars and heavy vehicles	139
1.2 Engine nomenclature	2	5.5 Engine coolant	141
1.3 Operating principles	4	5.6 Interior ventilation and heating	143
1.4 Basic structure and mechanism	9	5.7 Introduction to passenger car air conditioning systems	147
1.5 Cylinder and crankthrow arrangements	12	5.8 Principles of refrigerated air conditioning	147
1.6 Cylinder block, crankcase and head	16	5.9 Refrigerated air conditioning system components	148
1.7 Pistons and connecting rods	26	5.10 Full air conditioning systems	153
1.8 Crankshaft assembly and main bearings	35	5.11 Commercial vehicle refrigeration units	153
1.9 Crankshaft torsional vibration dampers	44	<b>6 Carburation and fuel injection</b>	156
1.10 Valve train	47	6.1 Fuel supply system	156
1.11 Timing drive	60	6.2 Fixed-choke carburettors	162
1.12 The principles of valve timing	66	6.3 Variable-choke carburettors	168
<b>2 The diesel engine</b>	71	6.4 Multiple and compound carburettors	171
2.1 Suitability for road transport	71	6.5 Electronically controlled carburettors	173
2.2 Operating principles	71	6.6 Petrol engine fuel injection	173
2.3 Cylinder block, crankcase and head	74	6.7 Multi-point fuel injection	175
2.4 Pistons and connecting rods	77	6.8 Single-point fuel injection	178
2.5 Crankshaft assembly and main bearings	80	6.9 Direct fuel injection	180
2.6 Valve train and timing drive	82	6.10 Electronic throttle control	181
<b>3 Combustion chambers and processes</b>	86	<b>7 Intake and exhaust systems</b>	183
3.1 Basic layouts of combustion chambers	86	7.1 Air cleaner and silencer	183
3.2 Combustion in the petrol engine	87	7.2 Intake and exhaust manifolds	185
3.3 Petrol engine combustion chambers	89	7.3 Exhaust system	189
3.4 Combustion in the diesel engine	94	7.4 Vacuum gauge and exhaust gas analyser	191
3.5 Diesel engine combustion chambers	95	<b>8 Diesel fuel injection systems</b>	193
3.6 Cylinder charge agitation	98	8.1 Fuel injection systems	193
<b>4 Engine lubrication</b>	100	8.2 Fuel supply system	193
4.1 Friction and wear	100	8.3 In-line fuel injection pump	196
4.2 The lubrication process	100	8.4 Governing the in-line fuel injection pump	200
4.3 Engine lubricating oils	102	8.5 Distributor fuel injection pump	205
4.4 Engine lubrication systems	106	8.6 Governing the distributor fuel injection pump	207
4.5 Oil pumps and pressure relief valves	114	8.7 Timing in-line and distributor fuel injection pumps	208
4.6 Oil filtration and cooling	117	8.8 Fuel injectors for jerk pump systems	209
4.7 Oil retention and crankcase ventilation	119	8.9 Unit fuel injection	213

## VI CONTENTS

8.10	Introduction to electronic diesel control	215	15.4	Improvements to torque converters	323
8.11	Common rail fuel injection	218	15.5	Fluid couplings and torque converters in service	323
8.12	Cold starting devices	220			
<b>9</b>	<b>Forced induction</b>	<b>223</b>	<b>16</b>	<b>Epicyclic gearboxes</b>	<b>326</b>
9.1	Natural aspiration and forced induction	223	16.1	Basic epicyclic gearing	326
9.2	Methods of pressure charging	223	16.2	Operation of epicyclic gear trains	327
			16.3	Friction brakes for epicyclic gearboxes	335
<b>10</b>	<b>Ignition and starter systems</b>	<b>232</b>	<b>17</b>	<b>Semi-automatic and automatic transmissions</b>	<b>340</b>
10.1	Coil ignition equipment	232	17.1	Semi-automatic transmissions for passenger cars	340
10.2	Ignition coil and capacitor	233	17.2	Semi-automatic transmissions for heavy vehicles	341
10.3	Ignition distributor and sparking plugs	236	17.3	Automatic transmissions for passenger cars	344
10.4	Introduction to electronic ignition systems	243	17.4	Hydraulic control systems	347
10.5	Types of electronic ignition system	245	17.5	Electrohydraulic control systems	354
10.6	Ignition timing	247	17.6	Automatic transmission fluid	356
10.7	Damp ignition in service	249	17.7	Checking the level and changing the fluid	358
10.8	The starter system	249	17.8	Automatic layshaft gearboxes	359
			17.9	Dual mode transmissions with sequential gearchange	359
<b>11</b>	<b>Engine emission control</b>	<b>255</b>	17.10	Direct shift gearbox	361
11.1	Petrol engine pollutants	255	17.11	Continuously and infinitely variable transmissions	363
11.2	Petrol engine emission control	256			
11.3	Diesel engine pollutants	258	<b>18</b>	<b>Overdrive gears</b>	<b>371</b>
11.4	Diesel particulate filters	259	18.1	Purpose and position of an overdrive gear	371
			18.2	Epicyclic overdrive gears	372
<b>12</b>	<b>Rotary piston engine</b>	<b>261</b>	18.3	Layshaft overdrive gears	374
12.1	Rotary piston engine	261	18.4	Automatic transmission overdrive gears	377
			<b>19</b>	<b>Drive lines</b>	<b>379</b>
<b>13</b>	<b>Friction clutches</b>	<b>265</b>	19.1	Universal joints	379
13.1	Types of single-plate clutch	265	19.2	Constant-velocity joints	382
13.2	Clutch control systems	268	19.3	Propeller shaft construction	389
13.3	Clutch centre plate construction	275	19.4	Drive line arrangements	392
13.4	Direct-release clutch	279	19.5	Rear-wheel drive and front-wheel drive layouts	396
13.5	Centrifugally operated clutches	279	19.6	Front-wheel drive shafts	399
13.6	Multiplate clutches	280	19.7	Tandem axle drives for heavy vehicles	400
13.7	Angle spring clutch	282	19.8	Drive lines for public service vehicles	401
13.8	Clutch misbehaviour in service	282			
13.9	Flywheel and clutch housing alignment	286	<b>20</b>	<b>Final drives and rear axles</b>	<b>403</b>
			20.1	Final drive gears and bearings	403
<b>14</b>	<b>Layshaft gearboxes</b>	<b>288</b>	20.2	Adjusting the final drive gears	408
14.1	Purpose and elements of the gearbox	288	20.3	Differential gears	414
14.2	Constant-mesh gearboxes	292	20.4	Rear axle construction	418
14.3	Synchromesh gearboxes	297	20.5	Final drive lubrication and sealing	423
14.4	Gear selector mechanisms	303	20.6	Rear axle misbehaviour in service	425
14.5	Heavy-vehicle gearboxes	308	20.7	Heavy-vehicle rear axles	426
14.6	Gearbox lubrication and sealing	313			
14.7	Gearbox misbehaviour in service	316			
<b>15</b>	<b>Fluid couplings and torque converters</b>	<b>317</b>			
15.1	Fluid couplings	317			
15.2	Improvements to fluid couplings	319			
15.3	Torque converters	319			

<b>21 Four-wheel-drive systems</b>	431	<b>26 Four-wheel-steering systems</b>	543
21.1 Types of four-wheel drive	431	26.1 The need for four-wheel steering	543
21.2 Basic considerations of four-wheel drive	432	26.2 Types of four-wheel steering	547
21.3 Part-time four-wheel drive	433		
21.4 Full-time four-wheel drive	435		
<b>22 Tyres, road wheels and hubs</b>	442	<b>27 Hydraulic brake systems</b>	552
22.1 Tyre requirements	442	27.1 Drum brake arrangements	552
22.2 Introduction to tyre characteristics	442	27.2 Disc brake arrangements	559
22.3 Tyre construction	444	27.3 Brake friction materials	565
22.4 Road wheels and hubs	452	27.4 Hydraulic brake systems and components	566
22.5 Wheel balancing	457	27.5 Hydraulic brake fluids	577
22.6 Safety precautions in tyre servicing	459	27.6 Vacuum servo-assisted braking	579
		27.7 The parking brake system	582
<b>23 Suspension systems</b>	461	27.8 Hydraulic power brakes	584
23.1 Basic ride considerations	461	27.9 Maintenance of hydraulic brakes	586
23.2 Types of suspension	461	27.10 Brake efficiency and testing	589
23.3 Basic handling considerations	472		
23.4 Types of suspension spring	472	<b>28 Air and endurance brake systems</b>	591
23.5 Tandem axle suspension	486	28.1 Principles of air brakes	591
23.6 Shock dampers	489	28.2 Compression and storage	592
23.7 Adaptive suspension systems	493	28.3 System control	594
23.8 Active roll control systems	494	28.4 System actuation	600
23.9 Suspension misbehaviour in service	495	28.5 Hand-operated brake valves and other equipment	605
		28.6 Air disc brakes	606
<b>24 Manual steering</b>	496	28.7 Endurance brake systems	610
24.1 Steering principles and layout	496		
24.2 Front end geometry and wheel alignment	499	<b>29 Anti-lock brakes and traction control</b>	614
24.3 Steering and suspension ball joints	506	29.1 Background to anti-lock braking	614
24.4 Manual steering gears	509	29.2 Basic components of anti-lock brake systems	614
24.5 Inspecting and adjusting the steering mechanism	515	29.3 Types of anti-lock brake systems	615
24.6 Conventionally steered and self-steering axles for heavy vehicles	518	29.4 Output control channels for anti-lock brakes	618
24.7 Steering wheel airbags	519	29.5 Anti-lock air brakes for heavy vehicles	620
		29.6 Traction control systems	621
<b>25 Power-assisted steering</b>	521	29.7 Vehicle dynamics control	622
25.1 The need for power-assisted steering	521		
25.2 Principles of hydraulic power-assisted steering	521	<b>30 Vehicle structure and aerodynamics</b>	625
25.3 Hydraulic power-assisted steering components	524	30.1 Integral body construction	625
25.4 Speed-sensitive hydraulic power-assisted steering	532	30.2 Aluminium body construction	636
25.5 Hydraulic power-assisted steering misbehaviour in service	536	30.3 Multi-purpose vehicles	638
25.6 Electro-hydraulic power-assisted steering	536	30.4 Commercial vehicle chassis frames	638
25.7 Introduction to electrical power-assisted steering	538	30.5 Trailer and caravan couplings	644
25.8 Electrical power-assisted steering components	539	30.6 Introduction to vehicle aerodynamics	648
25.9 Types of electrical power-assisted steering	540	30.7 Basic considerations of vehicle aerodynamics	649
		30.8 Aerocoustics	650
		30.9 Heavy vehicle aerodynamics	651

## VIII CONTENTS

<b>31</b>	<b>Alternative power sources and fuels</b>	652	32.3	Layout of battery-electric vehicles	655	
	31.1	General background	652	32.4	Basic units of battery-electric vehicles	655
	31.2	Modern requirements for alternative fuels	652	32.5	Hybrid-electric vehicles	657
	31.3	Classification of alternative fuels	653	32.6	Layout of hybrid-electric vehicles	657
			32.7	Basic units of hybrid-electric vehicles	658	
			32.8	Fuel-cell vehicles	659	
<b>32</b>	<b>Battery-electric, hybrid and fuel-cell vehicles</b>	655	32.9	Operation and types of fuel-cell	659	
	32.1	General background	655	32.10	Layout of fuel-cell vehicles	660
	32.2	Battery-electric vehicles	655			
				<i>Index</i>		661
